

به نام خدا

اسماعیل زارع

برنامه ای بنویسید که سن کاربر را بگیرد و سال تولدش به میلادی و شمسی نمایش دهد

The image shows two windows from the Python IDLE 3.11.1 environment. The top window, titled 'sanstest.py - C:\Users\zare-e\Desktop\sanstest.py (3.11.1)', contains the following Python code:

```
sen = int(input("Enter Your sen: "))

import datetime

x = datetime.datetime.now()

sal=(x.year)-sen
sal_shamsi = sal - 622

print ("sale tavalod miladi" ,sal)
print ("sale tavalod shamsi" ,sal_shamsi)
```

The bottom window, titled 'IDLE Shell 3.11.1', shows the output of the script. It starts with the standard Python 3.11.1 startup message. After the script is executed, it displays the following output:

```
>>> ===== RESTART: C:\Users\zare-e\Desktop\sanstest.py =====
Enter Your sen: 20
sale tavalod miladi 2003
sale tavalod shamsi 1381
>>>
```
